

Ideal for cutting polystyrene (EPS, XPS) insulation panels.

Avoid thermal bridges and crumbling, reduce waste and pollution, increase safety and productivity.

- Low voltage (36V) power supply included.
- Large calibre cutting wire, very long life.
- Extremely high productivity: no rest-time required between one cut and the next.
- Works on EPS, expanded/extruded polystyrene and polyurethane foams
- Allows for straight, angle and/or partial cuts.
- Ground foot allows for angle cuts while in vertical position
- Usable vertically, leaning on a wall.
- Also usable vertically via lone-stand option or scaffold anchoring option.
- Easily transportable, unfolds into work condition in just 4 moves and less than 1 minute.
- Fully extractable cut bow allows for free hand operation
